

Using the 'make ten' strategy

Wednesday 13th January 2021

Have a go at drawing your own tens frame like the one here.

Now use tens frames to complete these sums.

$$\begin{array}{cc} 8 + 5 & 5 + 6 \\ 6 + 8 & 4 + 7 \end{array}$$

You may find these sums easy but the important thing is to get speedy at the 'make ten' strategy as this will really help with future maths.
