

From the middle top-to-the middle bottom, sketch in this curved line.

Tortoise is a bit of an egg shape.. Leave a space at the top left (that's for his head).

And then a matching line behind it

Next we add the detail pattern to his shell.

Let's sketch in his head next. It looks like a fat sausage shape!

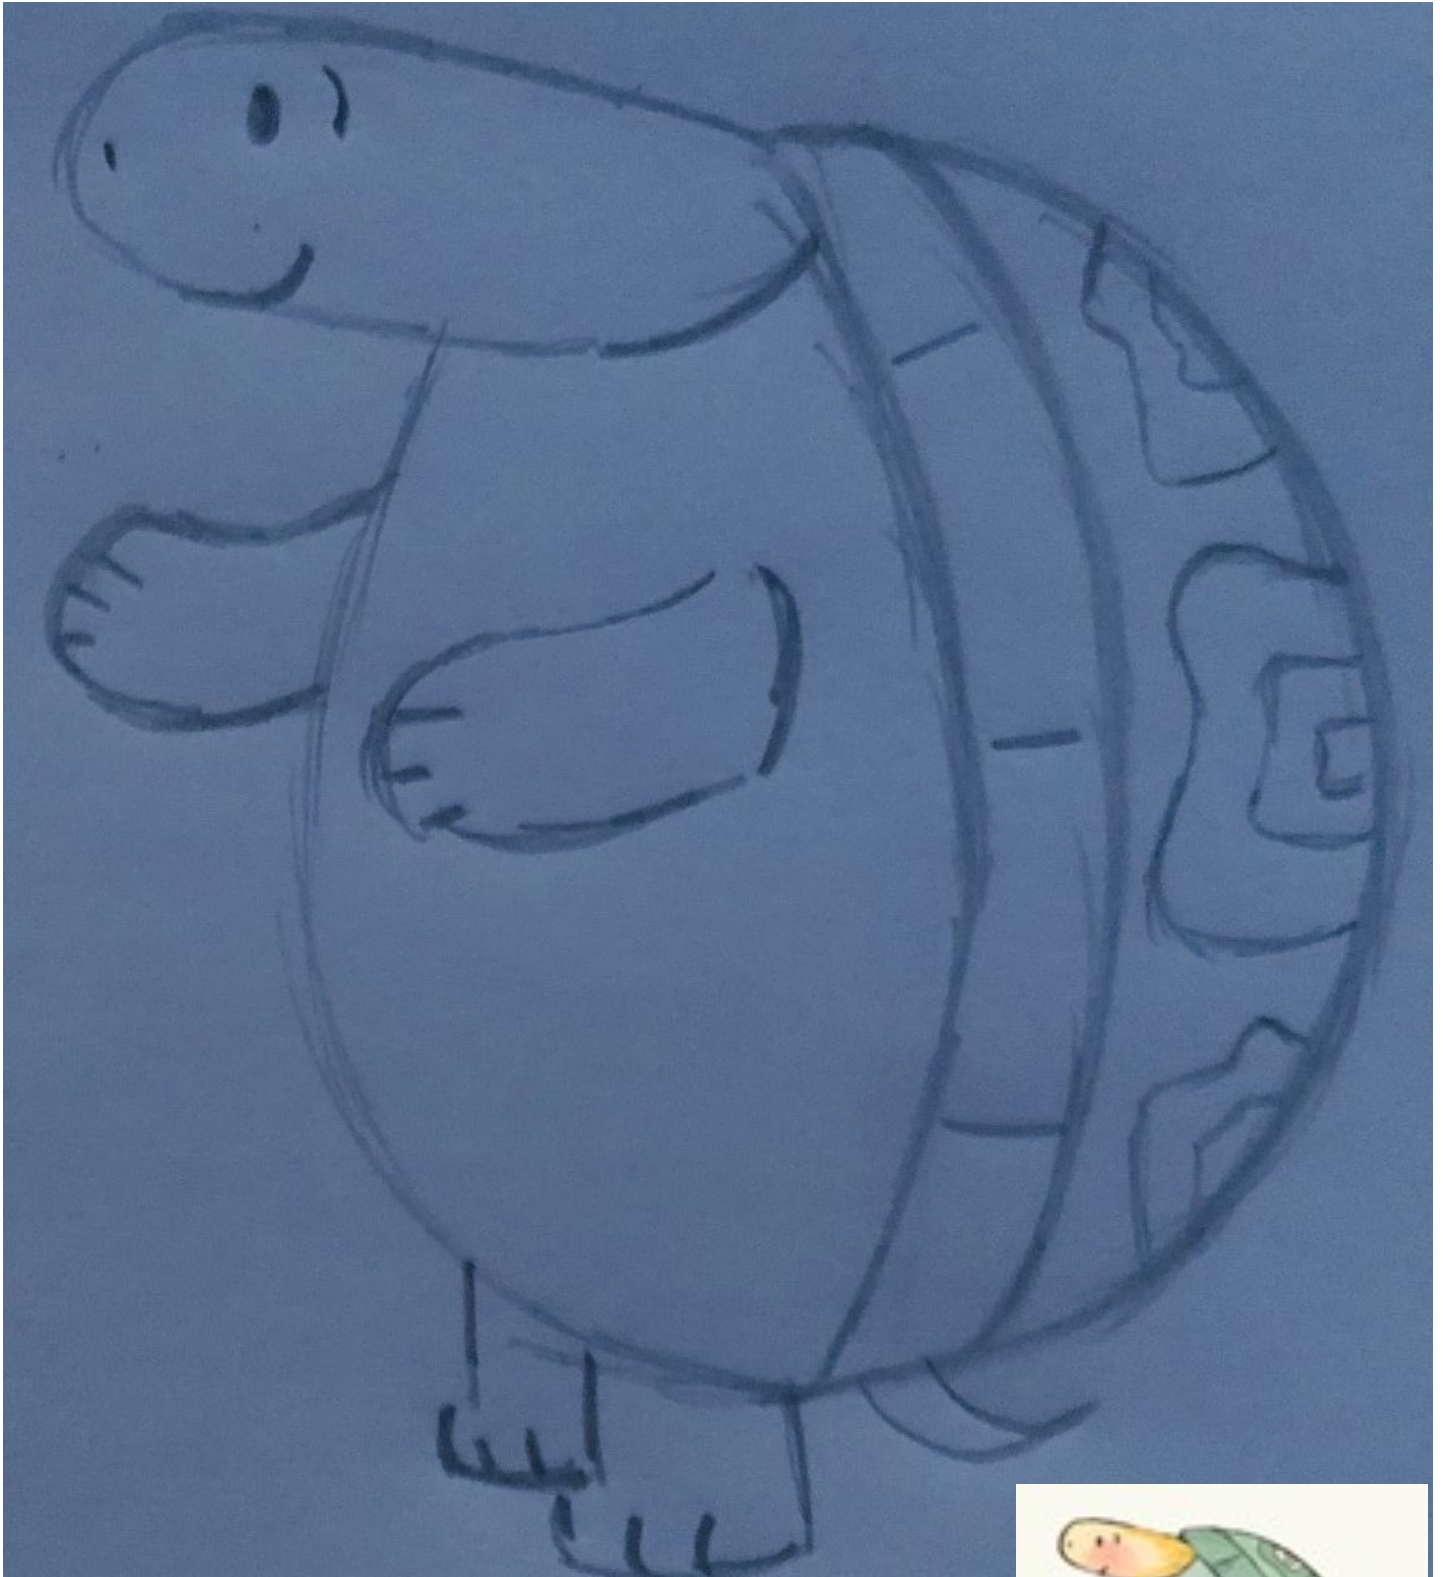

He will look more like Tortoise when we add his nose, eye, eyebrow and smile. Look carefully where to add them..

Let's give him 2 hands.

Time to add a leg and draw 3 lines for toes.

Draw in a shorter second leg (it looks shorter because it's behind). Don't forget his tail!

Start from this line of his shell with the back of his leg.

Well done! Are you happy with your Tortoise? Is he ready for some colour? Will you use paints, crayons or felt-tips? I think the illustrator uses watercolours to get the different shades of green . If you love your Tortoise.....send us a picture.
