

Think about how the drawings you can use to share things equally!

Veruca Salt stole 10 walnuts from The Nut Room. She hid an equal number in the pockets of her dress. She had 2 pockets. How many walnuts were in each pocket?

Violet Beauregarde ate the same number of sticks of gum every day. Over a week, she ate 14 sticks of gum. How many did she eat each day?

Mike Teavee was told to tidy away his toy guns. He had 20 guns and 5 boxes. If each box held the same amount of guns, how many would there be in each?

Augustus Gloop's family ate 30 sausages for dinner. Mr Gloop, Mrs Gloop and Augustus all shared the sausages fairly. How many did they have each?

There are seven people in Charlie Bucket's family. Charlie saved 14p and shared it equally with his family. How much money did each person get?
