

Think about the division facts you know to solve these problems.

Veruca Salt stole 18 walnuts from The Nut Room. She hid an equal number in the pockets of her dress. She had 3 pockets. How many walnuts were in each pocket?

Violet Beauregarde ate the same number of sticks of gum every day. Over a week, she ate 35 sticks of gum. How many did she eat each day?

Mike Teavee was told to tidy away his toy guns. He had 24 guns and 6 boxes. If each box held the same amount of guns, how many would there be in each?

Augustus Gloop's family ate 27 sausages for dinner. Mr Gloop, Mrs Gloop and Augustus all shared the sausages fairly. How many did they have each?

There are seven people in Charlie Bucket's family. Charlie saved 28p and shared it equally with his family. How much money did each person get?
