

Science

Impact

Our curriculum impact empowers our pupils to be aware of future careers, spark interest in continued learning and fulfil their potential to be the best that they can be.

- The children at Chuter Ede can use technical vocabulary, are confident to ask scientific questions and retain key science knowledge.
- Children are interested in the world around them and have a set of key skills which they can use to investigate it.
- Children enjoy learning in science and value the subject.
- They understand its relevance and importance in a real world context and see themselves as scientists not only in school, but in the future.
- The work produced is of a high quality.

"Valuing everyone and aiming for our best"
