

DT

Intent

At Chuter Ede, we are technologists.

In Design & Technology, we want our children to be inspired, excited and engaged to learn how to cook, design, make and evaluate as part of a well structured and rich curriculum.

Our intent:

- For all our children to have fun being Design Technologists and develop a love of learning
- To encourage all our pupils to be innovative and creative thinkers who have an appreciation for the product design cycle through ideation, creation, and evaluation.
- We want all our pupils to develop the confidence to take risks, through drafting design concepts, modelling, and testing and to be reflective learners who evaluate their work and the work of others.
- We aim to build an awareness of the impact of design and technology on our lives and encourage all our pupils to become resourceful, enterprising citizens who will have the skills to contribute to future design advancements.
- We want every child to believe that, if they want to, they can become the next generation of cooks, designers, innovators and technologists.
- To enable all our pupils to meet the end of key stage attainment targets in the National curriculum and their personal learning targets.
- For EYFS children to work confidently towards the Development Matters statements and the Early Learning Goals.
- To inspire children and young people to create, experience, and participate in great arts and culture.

"Valuing everyone and aiming for our best"
