

Our Science Vision at Chuter Ede

"Science will encourage and inspire children to be curious about the world around them through questioning, exploring and investigating. It will promote respect for living and non-living things and develop an awareness of the possibilities of a future career in Science."

Teachers feel confident to deliver well planned content.

Children are curious and are encouraged to ask questions.

Children are aware of the different types of enquiry.

Children confidently plan and carry out investigations.

Children have a clear understanding of what science is.

Children have an awareness of possible careers in science.

Children use scientific vocabulary confidently and accurately

Children use science to make links to real life and other areas of the curriculum.

We know how to use equipment to make measurements.

We learn about the real world outside.

We learn from real scientists who visit us in school.

We DO investigations.

We use scientific vocabulary!!

We record our observations.

We make predictions.
